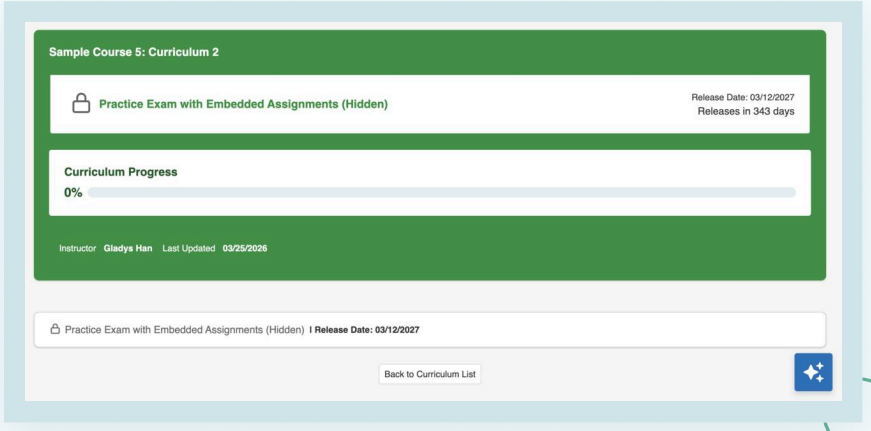
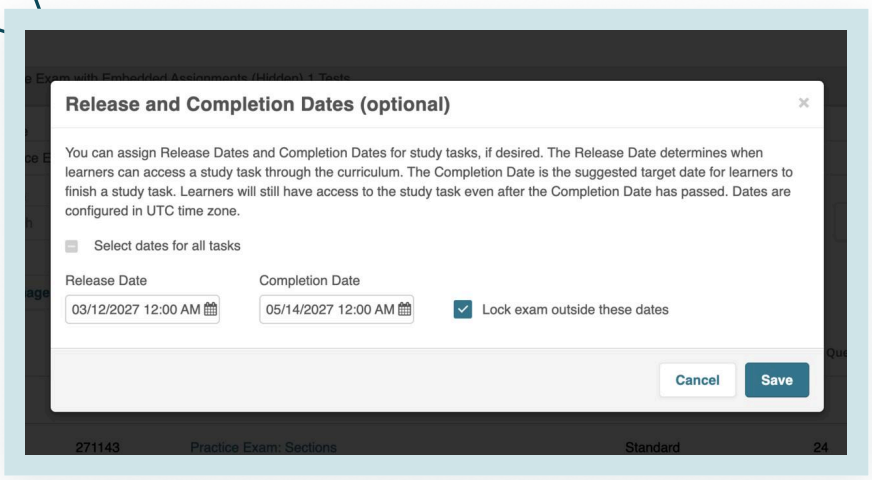
# Assignments: Deliver Targeted Learning with Precision and Control

BenchPrep's Assignments empower organizations to deliver highly targeted, instructor-driven learning experiences without disrupting core course structures. With Assignment Tasks, admins can assign targeted content to specific learners at scheduled times while keeping the broader learning experience clean, focused, and scalable.

Whether you're guiding a cohort through a structured review or assigning remediation to individual learners, Assignments give you the flexibility to meet learners where they are without adding operational complexity.





## Key Features

### Targeted Assignments Without Disrupting the Study Plan

Create custom learning tasks from lessons, question sets, or tests and assign them directly to individuals or groups without affecting Study Plan progress or structure.

### Schedule Content Availability with Controlled Assessment Delivery

Keep exams and tests locked from assigned learners until their scheduled release dates, enabling more strategic and secure assessment workflows.

### Flexible Task Scheduling

Set release and due dates at the task level to guide pacing and support structured learning experiences across cohorts.

### Assignment Templates

Create assignments faster with ready-to-use templates organized by exam section, learning modality, or timeframe.

# Benefits

## For Learners

- **Clear Expectations, Less Confusion**
  Instructor-assigned tasks are clearly separated from independent study, making it easy to understand what to focus on and when.
- **Improved Focus and Accountability**
  With due dates, progress tracking, and structured assignments, learners stay on track and engaged.
- **More Personalized Learning**
  Receive assignments tailored to your needs, whether for reinforcement, remediation, or exam readiness.

## For Administrators

- **Precision Without Rework**
  Assign targeted content without rebuilding courses, duplicating materials, or restructuring Study Plans.
- **Smarter Content Delivery**
  Control exactly what learners see—and when—by scheduling release dates of content with curated assignments.
- **Streamlined Operations**
  Reduce the need for workaround solutions like separate courses or manual tracking for differentiated instruction.

## For Organizations

- **Improved Learner Experience**
  Deliver tailored learning experiences across individuals and cohorts without increasing operational overhead.
- **Stronger Learning Outcomes**
  Guide learners through the right content at the right time, improving comprehension, retention, and performance.
- **More Sophisticated Program Design**
  Enable advanced instructional strategies like staged assessments, remediation paths, and cohort-based learning journeys.

## Ready to Deliver More Targeted Learning Experiences?

Connect with your Customer Success Manager to see how Assignments can help you deliver personalized, structured, and scalable learning experiences—without the operational overhead.
